(54) Title: ARRANGEMENT FOR GUIDING A WEB AND FOR DOCTORING A CALENDER ROLL IN A CALENDER

(57) Abstract: An arrangement in a calender for guiding a paper web (W) from one nip (N) to another nip and for doctoring a calender roll (1, 2). In accordance with the invention, a doctor (4) is supported by a guide means (5) of the web (W), to which guide means (5) the doctor (4) has been attached and which includes at least one stationary and convex guide surface (51) which receives the web from one nip (N) of the calender and over and on which the web is guided towards the other nip of the calender, so that between the guide surface and the web there is a medium layer which carries the web.
